

Increasing Capacity Framework Agreement (ICFA)		
GUIDANCE DOCUMENT		
Area of Business	Healthcare Services	
Target Audience	NHS Trusts and NHS Foundation Trusts providing acute services; Clinical Commissioning Groups; NHS England as commissioner of specialised services	
Applicable Sectors	National Health Service	
Contacts	Increasing Capacity Support Team NHS Arden GEM CSU T: [insert] E: increasingcapacityframework@nhs.net	
Framework Reference Number	NHS England – AGEM 41574	
Project Stakeholders	NHS England Regional Teams NHS Trusts and NHS Foundation Trusts Clinical Commissioning Groups	
Framework Duration	20 <sup>th</sup> November 2020 to 19 <sup>th</sup> November 2022 (with 1 x 24 month extension option exercisable by NHS England on behalf of all contracting authorities)	

## AIM OF DOCUMENT

This document is to be used as a guide for NHS England, NHS Trusts, NHS Foundations Trusts and Clinical Commissioning Groups (each a "**Contracting Authority**") to call off from the Increasing Capacity Framework (the "**Framework**").

The guidance is structured into a three step process (select, confirm, award):

- Step 1: Use the on-line Database to **select** relevant Framework Providers;
- Step 2: Use the Direct Award or Mini-Comp Templates to **confirm** with selected Framework Providers if they can meet the requirement;
- Step 3: Use the NHS Standard Contract or Sub-Contract Templates to **award**.

## STEP ONE: SELECT

## Framework Provider Database

The available Framework Providers, by site and service line, can be searched in the Framework Provider Database. The web link below will enable Contracting Authorities to register system users to access the Database.

## www.nhscapacity.co.uk

If you have a query regarding the Database please e-mail: <a href="mailto:support@adviseinc.co.uk">support@adviseinc.co.uk</a>

## Pricing

The Framework provides for the prices and any discounts offered by a Framework Provider in respect of Services for which the National Tariff specifies a national price and/or a best practice tariff and other non-mandatory published rate (for convenience all referred to in this guide as a "**National Price**"). Where there is a National Price for a Service or Services, they are termed "**Nationally Priced Services**" in this guide. Where Services are not subject to a National Price, these are referred to in this guide as "**Locally Priced Services**". Further detail on Nationally Priced and Locally Priced Services is included at **Annex 1**.

## **STEP 2: CONFIRM**

#### Call-Off Process

A Contracting Authority is able to award a contract or sub-contract (see "Call-off Contract and Sub-Contracts" section of this guide for an explanation of this) to a Framework Provider by a direct award or by undertaking a mini-competition, as set out in this section.

To support Contracting Authorities the on-line database includes template forms that Contracting Authorities can tailor for use in a call-off process.

A template Direct Award form can be used to provide and request information from an identified Framework Provider. A template Mini-Competition form can be used to launch a mini-competition with identified Framework Providers.

#### Circumstances in which direct award can be used

- 1) In order to assist in transition to the Framework, within the first six months following the commencement date (i.e. at any time on or before 19 May 2021), Contracting Authorities will be able to place an NHS Standard Contracts or Sub-Contracts (as appropriate) for Nationally Priced Services by direct award to a Framework Provider that is able to undertake the required Services. The duration of any such NHS Standard Contracts or Sub-Contracts (as appropriate) must not be longer than 6 months.
- 2) Throughout the entire term of the Framework, Contracting Authorities can place NHS Standard Contracts or Sub-Contracts (as appropriate) for Nationally Priced Services by direct award if any of the following three situations apply:
  - a. the Framework Provider operates a site offering the relevant Services that is within a geographical area that the Contracting Authority (acting reasonably) considers is appropriate to enable its patients to access the Services AND in comparison to other Framework Providers within the geographical area referred to above, the Framework Provider has submitted the lowest prices (including MFF) for the Services taking into account where applicable, any discount options;
  - all the selected Framework Providers within the defined geographical area (see point a. above) are needed to meet the Contracting Authorities requirement (i.e. a call-off contract will be placed with all the identified Framework Providers within the defined geographical area); or
  - c. a mini-competition is undertaken (see below) and only one response is received.

## Process for direct award

The process to be followed where one or more Contracting Authorities intend to award an NHS Standard Contract or Sub-Contract by direct award is set out below:

- 1) The Contracting Authority will develop a clear statement detailing its requirements for the provision of the Services ("**Statement of Requirements**").
- 2) The Contracting Authority will send a populated version of the NHS Standard Contract (full length version) Particulars or a populated version the NHS Standard Contract template Sub-Contract (full length version) (as appropriate), reflecting the Statement of Requirements, to the Framework Provider. This should be accompanied by a request for the Framework Provider to provide specific information to enable the Contracting Authority to finalise the NHS Standard Contract or Sub-Contract. The template Direct Award form contains the information most likely to be requested. Contracting Authorities will need to request all information necessary to finalise the NHS Standard Contract or Sub-Contract. It is preferable for Contracting Authorities to request the information and add it themselves to the NHS Standard Contract or Sub-Contract as this enables the Contracting Authority to retain version control over the NHS Standard Contract or Sub-Contract.
- 3) On receipt of the populated version of the NHS Standard Contract or Sub-Contract and any request for information, the Framework Provider must promptly indicate to the Contracting Authority whether it is able to accept the NHS Standard Contract or Sub-Contract and any information required by the Contracting Authority to finalise it.

## Circumstances in which a mini-competition can be undertaken

- Throughout the entire term of the Framework, Contracting Authorities will have the option to undertake a mini-competition for an NHS Standard Contract or Sub-Contract (as appropriate) for Nationally Priced Services or Locally Priced Services.
- 2) Contracting Authorities should note that where a Contracting Authority is seeking to procure Services by unbundling the National Price, a mini-competition is required to determine the final price.

## Process for mini-competition

The process to be followed where Contracting Authorities intend to award an NHS Standard Contract or Sub-Contract by undertaking a mini-competition is set out below:

- 1) The Contracting Authority will develop a clear Statement of Requirements setting out its requirements for the Services.
- 2) The Contracting Authority will identify the Framework Providers capable of supplying the Services from the on-line Database using the available search facility.
- 3) In identifying the Framework Providers capable of supplying the Services, the Contracting Authority may, acting reasonably, determine a geographical area that it considers appropriate in relation to access to the Services by patients and identify the Framework

Providers who, on the basis of the information provided in the on-line Database have a site located within the determined geographical area from which the Services can be provided.

- 4) The Contracting Authority will develop the mini-competition award criteria which may be any of, or a combination of any of, the following:
  - quality of the Services as determined by the Contracting Authority;
  - accessibility of the Services to a patient/group of patients;
  - experience of the clinical team providing the Services;
  - capacity/availability of Services;
  - local factors which are proportionate and relevant to the Services; and/or
  - price.
- 5) The Contracting Authority will invite responses by conducting a mini-competition process. The template Mini-Competition form can be tailored and used as the invitation to submit responses. The form and timetable of that process can be determined by the Contracting Authority but must include inviting the Framework Providers identified above to submit a response for the proposed NHS Standard Contract/Sub-Contract. The invitation should be accompanied by a populated version of the NHS Standard Contract (full length version) Particulars or a populated version of the template Sub-Contract (full length version) (as appropriate), reflecting the Statement of Requirements.
- 6) The Contracting Authority will apply the mini-competition award criteria to compliant responses as the basis of its decision to award the proposed NHS Standard Contract/Sub-Contract.

## Financial Standing

Contracting Authorities may want identified Framework Providers to confirm that the financial standing requirements tested during the procurement of the Framework continue to be satisfied. Where a Contracting Authority intends to directly award an NHS Standard Contract or Sub-Contract, this confirmation can be specifically requested as part of the request for information. Where a Contracting Authority intends to launch a mini-competition, this confirmation can be built into the invitation to submit responses.

## STEP 3: AWARD

#### Call-Off Contracts and Sub-Contracts

For the purposes of calling off the Framework, Contracting Authorities must consider the following:

- 1) All call-off contracts and sub-contracts are new agreements and cannot be an extension of or variation to an existing contract or sub-contract.
- 2) All call-off contracts and sub-contracts entered into pursuant to the Framework must be in the form of the latest published version of:
  - a. the NHS Standard Contract if the Contracting Authorities calling off are one or more CCGs and/or NHS England; or
  - b. the Template Sub-Contract to the NHS Standard Contract if the Contracting Authorities calling off are one or more NHS Trusts and/or NHS Foundation Trusts.
- 3) An NHS Trust or NHS Foundation Trust cannot be a "Commissioner" under an NHS Standard Contract, and a CCG or NHS England cannot be a "Head Provider" under a Sub-Contract. It is not possible for a mixture of commissioning bodies (CCGs and/or NHS England) and NHS providers (Trusts and/or FTs) to be purchasers under the same arrangement, because they are performing different statutory functions.
- As part of the process for being accepted onto the Framework, each Framework Provider has confirmed acceptance of the terms of the NHS Standard Contract and the Template Sub-Contract.
- 5) The NHS Standard Contract is published in full-length and shorter-form versions. The fulllength version is appropriate for all Services under the Framework and must be used by CCGs and by NHS England when calling off the Framework.
- 6) The Template Sub-Contract is published in full-length and shorter-form versions. Any calloff of Services by a NHS Trust or NHS Foundation Trust will involve placing a sub-contract in accordance with the terms of the (full length) NHS Standard Contract(s) which that NHS Trust or NHS Foundation Trust has in place with its commissioners, including the requirement for the consent of the co-ordinating commissioner (see GC12 of the NHS Standard Contract). The Template Sub-Contract (full-length version) must be used by NHS Trusts and Foundation Trusts when calling off the Framework.
- 7) The Contracting Authority must not agree to any request from a Framework Provider:
  - a. that a local designed agreement or the Framework Provider's own terms and conditions apply in place of the NHS Standard Contract or Template Sub-contract; or
  - b. to vary any provision of the NHS Standard Contract except (after it has been awarded) as permitted by General Condition 13 (Variations).
- An Activity Reporting Guidance document is set out at Annex 2 of this guide. The Contracting Authority must consider if any activity reporting as set out in the Activity

Reporting Guidance document is required under the call-off contract or sub-contract (in addition to any other reporting requirements set out in the call-off contract or sub-contract). If such activity reporting is required, it must be incorporated into the call-off contract or sub-contract. Framework Providers are required by the Framework Agreement to:

- not refuse the inclusion of such activity reporting in the call-off contract or sub-contract; and
- assist in including such activity reporting in the call-off contract or sub-contract.
- 9) Contracting Authorities should satisfy themselves that the Framework Provider to whom they intend to award a contract has appropriate indemnity arrangements in place. This can be achieved by requiring provision of appropriate documentation prior to signature of the contract/sub-contract or by use of a condition precedent within the contract/sub-contract.
- 10) Contracting Authorities must consider how price should be treated in the NHS Standard Contract and the Template Sub-contract. Annex 3 provides further information on how price should be treated under certain circumstances.
- 11) When completing the NHS Standard Contract or the Template Sub-contract for a specific call-off, the Contracting Authority must ensure it contains:
  - the requirements as set out in the Contracting Authority's Statement of Requirements;
  - any activity reporting requirements set out in the Activity Reporting Guidance document set out at **Annex 2** of this guide;
  - the Framework Provider's response to the mini-competition process (where relevant);
  - the prices payable including any discount to a National Price and the relevant MFF (if applicable).

The web links to the full-length version of the NHS Standard Contract (and technical guidance) and the Template Sub-Contract are included below. Note that both will be updated for 2021/2022.

https://www.england.nhs.uk/publication/full-length-nhs-standard-contract-2020-21-particulars-service-conditions-general-conditions/ https://www.england.nhs.uk/publication/nhs-standard-contract-2020-21technical-guidance/ https://www.england.nhs.uk/publication/nhs-standard-contract-2020-21-subcontracts/

The eContract system hosts both the full-length and shorter-form Contracts and allows tailoring of the contract to reflect the specific services provided.

The eContract system can be accessed at the following web link: <u>https://www.econtract.england.nhs.uk/Home/</u> If you have a query on the eContract system, please email: <u>England.econtract@nhs.net</u>

## **Annex 1: Pricing**

#### **Nationally Priced Services**

- 1) The approach to pricing under a call-off contract/sub-contract is on a cost per case basis which is calculated by the multiplication of actual units of activity delivered by the relevant price for that activity.
- 2) The on-line database contains the Pricing Schedule for each site at which each Framework Provider has been appointed to offer Services under the Framework. If a Framework Provider has bid a discount to the National Price, it will be set out in the Pricing Schedule.
- 3) It should be noted that all Framework Providers' prices for Services subject to a National Price are capped at a maximum of National Price plus relevant MFF. There was no ability for a Framework Provider to submit a price for a Service that is higher than the National Price for that Service.
- 4) Framework Providers were able to propose a percentage discount that would apply if the combined spend with the Framework Provider across all commissioned activity from that Contracting Authority exceeds the threshold levels of £1m, £5m, and £10m. Where a Framework Provider has proposed such discounts, then the pricing schedule of the call-off contract/sub-contract needs to make clear that the discount will be applied. This type of discount, if applicable, is in addition to any other discounts submitted by the Framework Provider.
- 5) The NHS Trust/NHS Foundation Trust for the purpose of calculating the MFF for each of the Framework Providers' sites is included in the on-line database<sup>1</sup>.
- 6) If activity under a single call-off contract/sub-contract is carried out at multiple sites of the Framework Provider, and there are different MFF Provider codes/percentages referenced in the on-line database for those sites, then the applicable MFF will be that of the site that carries out the majority of activity under that call-off contract/ sub-contract.
- 7) The National Tariff may be amended from time to time and prices, currencies, rules and principles set out in the National Tariff may change. Where a Framework Provider has provided a percentage discount for a Nationally Priced Service, that percentage discount will be applied to the National Price under the latest version of the National Tariff. Similarly, where a Framework Provider has submitted percentage discounts in return for spend thresholds with any given Contracting Authority of £1m, £5m, and £10m, those discounts will continue to apply notwithstanding any changes to the National Prices.
- 8) Contracting Authorities have the option to agree to unbundle a National Price with a Framework Provider in accordance with the National Tariff, for example, where an NHS Trust or NHS Foundation Trust calls off the Framework and wishes to provide clinical staff to the Framework Provider to assist in delivery of the relevant Service in return for a discount from the applicable price. Any such unbundling must keep the total amount payable for the relevant currency within the relevant National Price.

<sup>&</sup>lt;sup>1</sup> The relevant NHS Trust/NHS Foundation Trust is the one which operates the closest hospital to the relevant Framework Provider site assessed on a basis of straight line distance. Reference to hospital is reference to a hospital run by the relevant NHS Trust or NHS Foundation Trust that routinely provides NHS services to NHS funded Service Users.

## Locally Priced Services

- 1) Where a Framework Provider has offered to provide a Locally Priced Service that is not subject to a National Price, those Services are listed in the on-line database.
- 2) As there is no National Price for these Services and therefore no reference to the price of these Services in the on-line database, the relevant price must be determined in accordance with the following principles:
  - a. the Contracting Authority and the Framework Provider will agree the relevant price per activity;
  - b. the Contracting Authority and the Framework Provider must agree whether any percentage discounts in return for committed spend thresholds with any given Contracting Authority of £1m, £5m, and £10m that may have been offered by the Framework Provider in respect of Nationally Priced Services are applicable;
  - c. MFF will not be applied to the price agreed between the Contracting Authority and the Framework Provider;
  - d. the price agreed between the Contracting Authority and the Framework Provider will be determined in accordance with the provisions of the National Tariff that apply to local pricing; and
  - e. if the Contracting Authority has paid for the same type of Services in either the financial year 2019/20 or the 12 months prior to the commencement of the Services under the call-off contract or sub-contract (whichever is later), then the price agreed between the Contracting Authority and the Framework Provider for the purposes of the call-off contract or sub-contract must not exceed that previous price.
- 3) If a call-off contract or sub-contract includes:
  - Locally Priced Services for which a price needs to be agreed as set out above; and
  - b. Nationally Priced Services for which there will be a price that can be already determined,

then the Contracting Authority and the Framework Provider are not permitted to agree a price for the call-off contract or sub-contract as a whole. The relevant price per activity for the Nationally Priced Services elements of the call-off contract or sub-contract (which will be either the National Price or the Framework Provider's discounted price as set out under the heading "Nationally Priced Services" above) must be applied to those elements.

4) If the National Tariff is updated to include prices for Services or elements of Services that did not previously have a price and are being provided under one or more call-off contracts or sub-contracts (as Locally Priced Services), then the relevant Services or elements of Services will be priced in accordance with the relevant prices set out in the National Tariff. Where this occurs, the price in the National Tariff will apply to the relevant Services or elements of Services from the date that the price in the National Tariff applies.

# **Annex 2: Activity Reporting Guidance**

## Introduction

It is important that all providers of NHS-commissioned care undertake appropriate activity reporting in order to inform local and national reporting and the production of national statistics.

A Framework Provider providing services pursuant to a contract or sub-contract put in place under the Framework will be required to report the following (where relevant):

- Aggregate Contract Monitoring (ACM)
- Patient Level Contract Monitoring (PLCM)
- Drug Patient Level Contract Monitoring (DrPLCM)
- Devices Patient Level Contract Monitoring (DePLCM)
- Admitted Patient Care Commissioning Data Set (APC CDS)
- Outpatient Commissioning Data Set (OP CDS)
- Diagnostic Imaging Data Set (DIDS)

This guidance provides information on the process for reporting the above data.

Data collected by a Framework Provider is required to be consistent with NHS data definitions as documented within the NHS Digital Data Dictionary version 3 (see <u>https://datadictionary.nhs.uk/about/about.html</u>). Organisation codes including Framework Provider and site codes must be consistent with information held by NHS Digital Organisation Data Service (see <u>https://digital.nhs.uk/services/organisation-data-service</u>). Acute NHS Provider codes are 3 characters in length and should not contain trailing zeros. Ward codes should not be used as a mechanism to distinguish different hospital / organisation sites.

The Framework allows:

- a commissioner (e.g. CCG or NHS England) to put in place a contract with a Framework Provider; or
- an NHS Trust or NHS Foundation Trust to put in place a sub-contract with a Framework Provider.

Where a commissioner puts in place a contract with a Framework Provider, then the "reported provider" of the activity is the Framework Provider (because the Framework Provider is receiving the monies for the activity directly from the commissioner).

Where an NHS Trust or NHS Foundation Trust puts in place a sub-contract with the Framework Provider, then the NHS Trust or NHS Foundation Trust that enters into the sub-contract is required to be recorded as the "reported provider" organisation.

When a contract or sub-contract is put in place pursuant to the Framework, the parties should ensure that the contract or sub-contract specifies the following:

- provider organisation code to be documented in all reporting
- provider site codes used for the service(s)
- commissioner organisation code (or clarify the process of identifying the appropriate commissioner)
- which organisation will be responsible for submitting which data flows

• data quality expectations.

#### Overview to the required data flows

#### Aggregate Contract Monitoring (ACM)

The purpose of the ACM is to create an aggregated summary of the activity and cost of the clinical service performed under a contract put in place pursuant to the Framework and is to be exchanged between the commissioner and the provider organisations.

The specification for the ACM being used in 2020/21 can be found here <u>https://www.england.nhs.uk/publication/aggregate-contract-monitoring-acm-specification-for-</u>2020-21/. A Framework Provider should familiarise itself with the guidance accompanying this template found here <u>https://www.england.nhs.uk/publication/aggregate-contract-monitoring-acm-user-guidance-2/</u>. This reporting template is currently being reviewed and may be subject to some minor changes for 2021/22.

The ACM is required to be submitted on a **monthly** basis and in accordance with the data submission timetable agreed between the commissioner and the provider.

Where a commissioner puts in place a contract with a Framework Provider, then the requirement is that the ACM is submitted to the relevant commissioner by the Framework Provider via the NHS Digital Data Landing Portal (DLP). In this instance the contract will need to stipulate which DSCRO will be receiving the data submission and the name of the data template stored on the DSCRO DLP instance. Where an NHS Trust or NHS Foundation Trust puts in place a sub-contract with the Framework Provider, then the ACM should be submitted by the Framework Provider directly to the NHS Trust or NHS Foundation Trust that enters into the contract.

#### Patient Level Contract Monitoring (PLCM)

The purpose of the PLCM is to provide a patient level (and identifiable) report of the activity including costs performed under a contract put in place pursuant to the Framework and is to be exchanged between the commissioner and the provider organisations. It may be helpful to note that under the contracts that NHS England put in place directly with independent sector providers for the purpose of responding to the Covid-19 pandemic (the "National IS Contracts") the PLCM was only used to record unbundled (diagnostic) activity since Inpatient and Outpatient activity can be captured in Commissioning Data Set flows to SUS.

The specification for the PLCM being used in 2020/21 can be found here <u>https://www.england.nhs.uk/publication/patient-level-contract-monitoring-plcm-specification-for-2020-21/</u> and the supporting guidance is located here <u>https://www.england.nhs.uk/publication/patient-level-contract-monitoring-plcm-user-guidance-2/</u>. This reporting template is currently being reviewed and may be subject to some minor changes for 2021/22.

The PLCM is required to be submitted on a **monthly** basis and in accordance with the data submission timetable agreed between the commissioner and the provider.

Where a commissioner puts in place a contract with a Framework Provider, then the requirement is that the PLCM is submitted to the relevant commissioner by the Framework Provider via the NHS Digital Data Landing Portal (DLP). In this instance the contract will need to stipulate which DSCRO will be receiving the data submission and the name of the data

template stored on the DSCRO DLP instance. Where an NHS Trust or NHS Foundation Trust puts in place a sub-contract with the Framework Provider, then the PLCM should be submitted by the Framework Provider directly to the NHS Trust or NHS Foundation Trust that enters into the sub-contract using appropriate data submission protocols to maintain the confidentiality of the patient data (e.g. encrypted etc).

## Drug Patient Level Contract Monitoring (DrPLCM)

The purpose of the DrPLCM is to provide a patient level (and identifiable) report of the use of high cost tariff excluded drugs including costs performed under a contract put in place pursuant to the Framework and is to be exchanged between the commissioner and the provider organisations. Note that under the National IS Contracts the DrPLCM was not used / required and is set out in this guidance because it will apply where activity provided under the contract includes the use of high cost tariff excluded drugs.

The specification for the DrPLCM being used in 2020/21 can be found here <u>https://www.england.nhs.uk/publication/drugs-patient-level-contract-monitoring-drplcm-specification-for-2020-21/ and the supporting guidance can be located here <u>https://www.england.nhs.uk/publication/drugs-patient-level-contract-monitoring-drplcm-user-guidance-2/</u>. This reporting template is currently being reviewed and may be subject to some minor changes for 2021/22.</u>

If the DrPLCM is required to be used it must be submitted on a **monthly** basis and in accordance with the data submission timetable agreed between commissioner and provider.

Where a commissioner puts in place a contract with a Framework Provider, then the requirement is that the DrPLCM is submitted to the relevant commissioner by the Framework Provider via the NHS Digital Data Landing Portal (DLP). In this instance the contract will need to stipulate which DSCRO will be receiving the data submission and the name of the data template stored on the DSCRO DLP instance. Where an NHS Trust or NHS Foundation Trust puts in place a sub-contract with the Framework Provider, then the DrPLCM should be submitted by the Framework Provider directly to the NHS Trust or NHS Foundation Trust that enters into the sub-contract using appropriate data submission protocols to maintain the confidentiality of the patient data (e.g. encrypted etc).

## Devices Patient Level Contract Monitoring (DePLCM)

The purpose of the DePLCM is to provide a patient level (and identifiable) report of the use of devices including costs performed under a contract put in place pursuant to the Framework and is to be exchanged between the commissioner and the provider organisations. The report format and supporting guidance has been created to monitor the use of high cost tariff excluded devices but where the Framework Provider has been provided the opportunity to procure both tariff included and excluded devices via a neighbouring NHS Trust or NHS Foundation Trust and NHS Supply Chain then the DePLCM should be used to capture both tariff included and excluded devices.

The specification for the DePLCM being used in 2020/21 can be found here <u>https://www.england.nhs.uk/publication/devices-patient-level-contract-monitoring-deplcm-specification-for-2020-21/</u> and the supporting guidance document can be located here <u>https://www.england.nhs.uk/publication/devices-patient-level-contract-monitoring-deplcm-user-guidance-2/</u>. This reporting template is currently being reviewed and may be subject to some minor changes for 2021/22.

In order to aid financial reconciliation, it is important that the device serial number is inserted into the relevant field of the DePLCM

If the DePLCM is required to be used it must be submitted on a **monthly** basis and in accordance with the data submission timetable agreed between commissioner and provider.

Where a commissioner puts in place a contract with a Framework Provider, then the requirement is that the DePLCM is submitted to the relevant commissioner by the Framework Provider via the NHS Digital Data Landing Portal (DLP). In this instance the contract will need to stipulate which DSCRO will be receiving the data submission and the name of the data template stored on the DSCRO DLP instance. Where an NHS Trust or NHS Foundation Trust puts in place a sub-contract with the Framework Provider, then the DePLCM should be submitted by the Framework Provider directly to the NHS Trust or NHS Foundation Trust that enters into the sub-contract using appropriate data submission protocols to maintain the confidentiality of the patient data (e.g. encrypted etc).

#### Admitted Patient Care Commissioning Data Set (APC CDS)

Where inpatient activity is undertaken under a contract put in place pursuant to the Framework it must be captured within an APC CDS record and submitted to NHS Digital Secondary Usage Services (SUS).

The CDS record must comply with the specification for CDS v6.2 and the Admitted Patient Care CDS type 130 (see

https://www.datadictionary.nhs.uk/data\_dictionary/messages/cds\_v6-2/data\_sets/cds\_v6-2\_type\_130\_-\_admitted\_patient\_care\_-\_finished\_general\_episode\_cds\_fr.asp?shownav=1).

It should be noted that CDS v6.3 is currently in development and is likely to be published as an updated Information Standards Notice during 2021. Framework Providers are required to conform to the requirements of the revised ISN (when published) including conformance to the implementation date of CDS v6.3.

Inpatient activity undertaken under a contract put in place pursuant to the Framework can be submitted by:

- The Framework Provider
- The NHS Trust or NHS Foundation Trust that enters into a sub-contract with a Framework Provider
- XML supplier on behalf of the Framework Provider

Where it is possible that the Framework Provider or an NHS Trust or NHS Foundation Trust could submit the data it is important to clarify (and document in the contract) which organisation is going to submit the data to SUS so as to eliminate the possibility of duplicate activity reporting.

As detailed at paragraph 1.4 of this Activity Reporting Guidance, the provider organisation code for the activity provided under a contract put in place pursuant to the Framework is required to be the organisation that is being paid by the commissioner for the activity. Therefore, in the case of an NHS Trust or NHS Foundation Trust putting in place a sub-contract with the Framework Provider, that NHS Trust or NHS Foundation Trust must be shown as the provider organisation code.

It is very important that the organisation site in which the Service User is receiving the clinical care is recorded accurately. The provider site code recorded must be one that is recognised by NHS Digital Organisation Data service. It is not appropriate to use ward codes as a mechanism to distinguish different physical hospital organisation sites.

The APC CDS is required to be submitted to SUS on a **weekly** basis.

#### Outpatient Commissioning Data Set (OP CDS)

Where Outpatient activity is undertaken under a contract put in place pursuant to the Framework it must be captured within an OP CDS record and submitted to NHS Digital Secondary Usage Services (SUS).

The CDS record must comply with the specification for CDS v6.2 and the Outpatient CDS type 020 (see <a href="https://www.datadictionary.nhs.uk/data\_dictionary/messages/cds\_v6-2/data\_sets/cds\_v6-2\_type\_020\_-\_outpatient\_cds\_fr.asp?shownav=1">https://www.datadictionary.nhs.uk/data\_dictionary/messages/cds\_v6-2/data\_sets/cds\_v6-2\_type\_020\_-\_outpatient\_cds\_fr.asp?shownav=1</a>). Please note that CDS v6.3 is currently in development and is likely to be published as an updated Information Standards Notice during 2021. Providers are required to conform to the requirements of the revised ISN (when published) including conformance to the implementation date of CDS v6.3.

Outpatient activity undertaken under a contract put in place pursuant to the Framework can be submitted by:

- The Framework Provider
- The NHS Trust or NHS Foundation Trust that enters into a sub-contract with a Framework Provider
- XML supplier on behalf of the Framework Provider

Where it is possible that the Framework Provider or an NHS Trust or NHS Foundation Trust could submit the data it is important to clarify (and document in the contract) which organisation is going to submit the data to SUS so as to eliminate the possibility of duplicate activity reporting.

As detailed at paragraph 1.4 of this Guidance, the provider organisation code for the activity provided under a contract put in place pursuant to the Framework is required to be the organisation that is being paid by the commissioner for the activity. Therefore, in the case of an NHS Trust or NHS Foundation Trust putting in place a sub-contract with the Framework Provider, that NHS Trust or NHS Foundation Trust must be shown as the provider organisation code.

The OP CDS is required to be submitted to SUS on a **weekly** basis.

#### Diagnostic Imaging Data Set (DIDS)

All providers of NHS commissioned diagnostic imaging tests are required to populate the Diagnostic Imaging Data Set. This is a patient level (and identifiable) dataset which captures details of the test and associated referral. The dataset is required to be completed **monthly** and submitted via the NHS Digital Portal in xml or csv format.

Further information can be found here <u>https://digital.nhs.uk/data-and-information/data-collections-and-data-sets/data-sets/diagnostic-imaging-data-set</u>

## **Data Quality**

It is the responsibility of the Framework Provider to ensure that activity reporting is of high quality. Where another provider has been charged with submitting data on behalf of the Framework Provider then the Framework Provider must ensure that they are sighted on the content and quality of data submitted.

In the case of Inpatient activity, the activity is required to be fully coded using where appropriate ICD diagnosis and OPCS procedure coding to illustrate the clinical care provided.

#### Other useful information

Should a Framework Provider wish to find out more about how to register and submit data to the NHS Digital Data Landing Portal please see <u>https://digital.nhs.uk/services/data-landing-portal</u>.

Information about how to submit Inpatient and Outpatient CD data to SUS can be found here <u>https://digital.nhs.uk/services/secondary-uses-service-sus</u>.

Should a Framework Provider wish to utilise an XML supplier to submit data to SUS on its behalf then IuVo are known to provide this service. In this instance the appropriate individual to contact to explore this topic further is <u>lee.williams@iuvo.co.uk</u>.

Should a Framework Provider (or an NHS Trust or NHS Foundation Trust purchasing services through the Framework) require new organisation site codes the following web link provides details of how to request new codes <u>https://digital.nhs.uk/services/organisation-data-service/org</u>

Circumstances	NHS Standard Contract (CCG)	Template Sub-contract (Trust)
A Contracting Authority has undertaken a mini- competition	If the price agreed for the Service is different to the relevant National Tariff price, the price will be a "Local Variation" as that term is used in Service Condition 36	The accepted price per activity will need to be set out in Schedule 3
The contract or sub-contract is for Nationally Priced Services and the information in the on-line database indicates that the Framework Provider has not submitted a discount to the National Tariff price	The relevant National Tariff price plus MFF (if applicable) will be considered the "National Price" as that term is used in Service Condition 36.	The relevant price will need to be set out in Schedule 3
The contract or sub-contract is for Nationally Priced Services and the information in the on-line database indicates that the Framework Provider has submitted a discount to the National Tariff price	The price plus MFF (if applicable) will be a "Local Variation" as that term is used in Service Condition 36	The relevant price will need to be set out in Schedule 3
The contract or sub-contract is for Nationally Priced Services and the information in the on-line database indicates that the Framework Provider has submitted percentage discounts in return for committed spend thresholds with any given Contracting Authority of £1m, £5m, and £10m	The effect of the existence of the discount means there is a "Local Variation" as that term is used in Service Condition 36	The discount will need to be set out in Schedule 3

# Annex 3: Standard Contract and Template Sub-contract Re Pricing
