

NIVS Application Changes – Jan 11th 2021

Dear Colleagues

Please see below the changes to NIVS that will be updated tonight Sunday 10th January.

BATCH Number Recording

When adding a batch, the Vaccine Type must be selected first, once selected, you can then proceed to enter the batch details. Two fields have been removed, Manufacturer ID and Unique Serial Number after MHRA confirmed these were not required for the application to collect.

It has also been confirmed that the BATCH Number for BOTH AstraZeneca and Pfizer will both be in the format of two upper case letters followed by 4 numbers (e.g. AA9999), the application will now enforce this format to support data quality of batch recording.

Add Batch

Vaccine Type

- ✓ -- Please Select --
- COVID-19 mRNA Vaccine BNT162b2
- Talent 0.5ml dose solution for injection multidose vials

PATIENT VACCINATION

The vaccination screen has been updated to reflect the changes to batch. The manufacturer and unique serial number have been removed from the data collection screen and the batch number results have also removed the unique serial number.

Patient Registration Screen

The screen has been updated for records added for Health and Care Worker Staff. The Staff Role will now be a mandatory drop down list, the values detailed in the screen shot below. This will need to be updated as users edit records for the staffs second vaccination.
