

NIVS Application Changes – Jan 14th 2021

Dear Colleagues

We have implemented the following changes to NIVS in a bid to support ongoing data record entry.

Patient Registration.

Following a technical review of our spine services provider, we have noted some problems that providers are having with registering patients, as such, we have reverted back to enabling Trusts to add records manually where they cannot find a match in NIVS. This is an intermediary change whilst we investigate further. We will keep the user community updated.

Dashboard

Following feedback and testing, we have made some changes to the reporting dashboard. The reporting numbers now exclude those patients who have a record but were not vaccinated. This update has been applied across each line.
