

Primary Care Websites

NHS Arden and Greater East Midlands Commissioning Support Unit

NHS Midlands and Lancashire Commissioning Support Unit

Need a GP practice website that improves digital access for your patients and meets NHS England guidance for usability and accessibility?

Our cost-effective solution helps you implement a new primary care website quickly and easily to support your patient's digital journey, enabling them to complete common tasks online.

Benefits of PrimaryWeb

- ▶ Enables you to build your own websites in under 60 minutes
- ▶ Keeps you safe and compliant with the latest national digital and accessibility guidance
- ▶ Simple and cost-effective system, using the latest technology
- ▶ Procurement economies of scale for PCNs and group GP practices.

Our credentials

- ▶ Leaders in the delivery of digital communications solutions and websites for NHS organisations and systems across the country
- ▶ We understand the changing health and care landscape has an impact on digital communications
- ▶ We have experts on accessibility which means you can be assured around compliance
- ▶ We're an NHS organisation, committed to public service values.

What's included

- ▶ Our team of digital experts can support you in the development and build of your websites; or we can provide a solution, which allows GPs and PCNs to build their own websites
- ▶ Two solutions, a standard and standard plus option
- ▶ On-going support available if required
- ▶ Annual Hosting and SSL
- ▶ Virtual training resources.

Bringing care closer to people's homes, whilst working within a limited financial envelope

Simple to use - saving time and reducing the burden on Primary Care staff

Flexible templates, with ability to select a choice of colour, whilst complying with NHS identity guidelines

Quick turnaround, with ability for a practice or PCN to configure their own site in under 60 minutes

Easy to scale up - designed to enable multiple practices to link together for easy management
